Sir:

In accordance with the duty of disclosure under 37 C.F.R. § 1.56, Applicants hereby notify the U.S. Patent and Trademark Office of the documents which are listed on the attached PTO/SB/08 A & B (modified) form and/or listed herein and which the Examiner may deem material to patentability of the claims of the above-identified application.

One copy of each of the listed documents is submitted herewith, except for the following: U.S. patents and/or U.S. patent publications; and co-pending non-provisional U.S. applications filed after June 30, 2003.

The present Information Disclosure Statement is being filed: (1) No later than three months from the application's filing date; (2) Before the mailing date of the first Office Action on the merits (whichever is later); or (3) Before the mailing date of the first Office Action after filing a request for continued examination (RCE) under §1.114, and therefore, no Statement under 37 C.F.R. § 1.97(e) or fee under 37 C.F.R. § 1.17(p) is required.

INFORMATION DISCLOSURE STATEMENT
U.S. Appln. No.: National Stage of PCT/JP2004/018291
Attorney Docket No. Q95729

In compliance with the concise explanation requirement under 37 C.F.R. § 1.98(a)(3) for foreign language documents, Applicants enclose herewith a copy of a Communication from a foreign patent office in a counterpart application citing such documents (Japanese language International Search Report for PCT/JP2004/018291 dated March 15, 2005), together with an English-language version (if not already included) of at least that portion of the Communication indicating the degree of relevance found by the foreign patent office.

In compliance with the concise explanation requirement under 37 C.F.R. § 1.98(a)(3) for foreign language documents, Applicants submit the following explanations:

Japanese Patent Application (KOKAI) No. 10-284789 - This document discloses a laser diode drive circuit which monitors an optical output of a laser diode, and controls so as to flow a laser diode bias current by bias circuit connected in parallel to the laser diode when the output is predetermined value or less. This document is also cited on page 4 in the specification of the present application and an English language abstract is attached.

Japanese Patent Application (KOKAI) No. 59-103565 - This document discloses a circuit which conducts a light emitting diode when the light emitting diode is not in a conduction state. It does not have a function for controlling a bypass circuit based on an external signal. This document is also cited on page 4 in the specification of the present application and an English language abstract is attached.

Japanese Patent Application (KOKAI) No. 59-113768 - This document discloses an optical gate signal generator which bypasses a current to a bypass circuit which has an alternative light emitting diode when an open malfunction occurs on a light emitting diode. This document is also cited on page 8 in the specification of the present application and an English language abstract is attached.

Attorney Docket No. Q95729

Japanese Patent Application (KOKAI) No. 2001-353897 - This document discloses an image forming apparatus which detects a light emitting state of a laser diode, and continues to drive a light emitting source when a malfunction number of light emitting source is predetermined value or less. An English language abstract is also attached.

The submission of the listed documents is not intended as an admission that any such document constitutes prior art against the claims of the present application. Applicants do not waive any right to take any action that would be appropriate to antedate or otherwise remove any listed document as a competent reference against the claims of the present application.

The USPTO is directed and authorized to charge all required fees, except for the Issue Fee and the Publication Fee, to Deposit Account No. 19-4880. Please also credit any overpayments to said Deposit Account.

Respectfully submitted,
